
SheCodesPsy 2026

Reprogramming stereotypes!

>> Empowering female psychology students with coding skills.

13–15 May, 2026 · University of Granada, Spain

Mind, Brain and Behavior Research Center (CIMCYC)

Hello world!

- Some *practicalities*
- Course overview and schedule
- Collaborative projects

- About Granada and the CIMCYC

Who are we?

Chiara
University of Granada

Ana Paqui
University of Granada

Elisa
University of Padova

Giada
University of Granada

Some *practicalities*

COMMUNICATION:

- E-mail: SheCodesPsy@gmail.com
- Telegram **channel**: we'll share main updates there.
- Telegram **chat group**: you can discuss there and organize for social activities.

CHANNEL

CHAT GROUP

Some *practicalities*

WORKSHOP REQUIREMENTS AND MATERIALS:

- You will work with your laptop/tablets, using the browser (Google Chrome, Mozzilla).
- **NO installation needed :)**
- You will need to be able to connect to the **Eduroam** internet network.
- You also need access to your **Google Account** (we will work on Google Colab, and store our materials in Googel Drive).
- All the materials are in our **GitHub repository**: https://github.com/shecodespsy/SheCodesPsy-2026

Some *practicalities*

VENUE AND HOW TO GET THERE:

- All lessons will take place at **SEMINARIO 5**, at the **Mind, Brain and Behavior Research Center** (CIMCYC), located at the Cartuja University Campus.
- The best option to get here is **by BUS:** you can get the line U1, U2, U3, and **8** (this one is the closest to the Corrala).
- You can also get there by foot - but be prepared for a long and steep uphill walk.

Some *practicalities*

ATTENDANCE & CERTIFICATES:

- We strongly encourage attendance to **ALL SESSIONS.**
- There is a minimum of 80% attendance rate required. That means that you can miss a **maximum of 4 hours.**
- **Only participants achieving the attendance criteria would get the PARTICIPATION CERTIFICATE** (issued after the workshop if finished).
- Meanwhile, if any of you need an **ACCEPTANCE CERTIFICATE** (to justify your absence to classes during the workshop), please let us know.

Some *practicalities*

WHERE TO EAT:

- Students staying at the Corrala de Santiago would get a complimentary breakfast there.
- **Coffee breaks** and **lunch** are provided by the workshop at the CIMCYC (main hall).
- You can also get coffee and snacks at the **CIMCYC cafetería**.
- **Dinner** is **not included** in the program! You'll find many tapas places around the Realejo (Corrala de Santiago neighborhood), as well as grocery stores.

Some *practicalities*

SOCIAL EVENTS:

- Great opportunity to get to know each other (and us!), bond, and learn about our culture.
- **TAPAS NIGHT:** it will be held at Bar Botánico on Wednesday night, at 20h. The price is 12€ each, including 4 drinks + 4 tapas. It's important that you bring cash! Vegetarian/vegan options included.
- **ALBAYCIN NIGHT TOUR:** Guided tour (in English) around the most iconic neighbourhood of Granada. This activity is covered by the workshop. We will meet here on Thursday at 20h.

Course overview and schedule

Most of you are **Psychology bachelor students**, and have *some* or **none previous experience** with coding/Python.

This workshop **AIMS** to…

- **Build the foundations:** we will *introduce* basic concepts common to most programming languages (variables, loops, functions…) so you can start **thinking** as a programmer.
- **Purposeful coding:** Connect these building blocks to actual use cases in psychology (run experiments, data analysis).
- **Reprogram your stereotypes!** Coding isn't magic nor hard, and should be accessible for us psychologists since bachelor-level education.

Course overview and schedule

This workshop **WILL NOT**…

- **Make you a Python expert** .Three days are not enough for that, and that's perfectly fine: <u>it’s not our goal</u>. We want to provide basic tools and concepts that will let you keep learning, growing, and eventually becoming the expert you want to be.
- **Make you an expert on experiment design/programming or statistical analysis**. There’s not time for that either. We’ll provide the opportunity of using your new coding skills with a meaningful purpose for future psychologists. But the goal will be to put **coding into action** rather than experiment coding or analysis *per se*.

Course overview and schedule

From	To	Wednesday May, 13	Thursday May, 14	Friday May, 15
8:30	9:00	Registration		
9:00	9:30	**Welcome and Introduction** *Programming, psychology, and women*	Python for psychologist **programming experiments**	Work on collaborative projects
9:30	10:00			
10:00	10:30	Intro to Python **building blocks I**		
10:30	11:00		*Coffee break*	
11:00	11:30		Python for psychologist **programming experiments**	*Coffee break*
11:30	12:00	*Coffee break*		Work on collaborative projects
12:00	12:30	Intro to Python **building blocks I**		
12:30	13:00		*Lunch break*	
13:00	13:30			
13:30	14:00	*Lunch break*	Python for psychologist **analyzing datasets**	*Lunch break*
14:00	14:30			
14:30	15:00	Intro to Python **building blocks II**		Collaborative projects: **presentations!**
15:00	15:30		*Coffee break*	
15:30	16:00		Python for psychologist **analyzing datasets**	*Coffee break*
16:00	16:30	*Coffee break*		Collaborative projects: **presentations!**
16:30	17:00	Intro to Python **building blocks II**		
17:00	17:30		Work on collaborative projects	**Closing**
17:30	18:00			
18:00	18:30	Collaborative projects kick off!		
20:00	open-ended	**Tapas night**	**Guided tour - Albaicyn**	

Collaborative projects

In addition to the lessons, you will work in groups to complete an applied, meaningful project:

- **Social Psychology:** explore and analyze a *real* survey-based database from the 2025 Spanish Youth & Gender barometer.
- **Experimental Psychology 1:** preprocess and analyze a multi-subject behavioral (accuracy, reaction time) dataset obtained with a conflict paradigm.
- **Experimental Psychology 2:** design and "program" a memory paradigm.
- **Clinical Psychology:** analyze a clinical dataset (generated in-silico) from two groups: patients at risk of eating disorder and control group.

On **Friday afternoon**, you'll show your colleagues your project. **DO NOT WORRY IF YOU DON'T GET TO THE END OF IT!** The projects were designed for different levels of expertise. Every step completed is already an achievement!

→ **PLEASE, ACCESS TO THE FORM SHARED ON THE TELEGRAM CHANNEL AND RANK THE PROJECTS.**

About Granada

How to get around?

Short answer: walk.

Granada is a pleasant and **safe** city to walk around and, sometimes, a difficulty city to navigate with public transportation.

If in a rush, take a cab!

What should you visit?

- The Albaicín and its breathtaking miradores (luckily, we have a guided tour planned 😉)
- Stroll through the lively streets and squares from the Realejo and the city center.
- Without a doubt, the **Alhambra**: if you have the time, it is absolutely worth visiting!

Where to eat?

Granada is worldwide known for its **tapas**, so don't miss them! We recommend you to take a tour around these streets and squares and try some of the local food:

- Plaza de la Romanilla, Trinidad and Bib-Rambla
- Calle Elvira
- Calle Navas
- Calle Gonzalo Gallas (students area)

*(*almost every bars will offer vegetarian/vegan options, but these can be somewhat limited)*

About the Mind, Brain and Behavior Research Center (CIMCYC)

> 250 researchers.

Experimental psychology
& Cognitive Neuroscience
Social Psychology,
Clinical Psychology and
Personality,
Psychobiology…
